Linda Priddy
EPA Region X
1200 Sixth Ave. HW-113
Seattle, WA 98101

Dear Ms. Priddy:

Enclosed is the ATSDR Site Review and Update (SRU) for the Old Inland Pit, Spokane, WA. The document was prepared by the Washington State Health Department under a Cooperative Agreement with ATSDR.

Although, the SRU may contain recommendations directed at the EPA and other agencies, the primary purpose of the SRU is to perform a review of current site conditions and recommend further actions for ATSDR to take at the site. An extensive evaluation of available data is not done for the SRU. If extensive evaluation is necessary due to the new information, the SRU will recommend that a health consultation or a public health assessment be performed. A written response is necessary only if significant errors are noted which should change the conclusions and recommendations made in the document.

If you have any questions please contact me at 553-5114.

Sincerely,

Richard Robinson
Regional Representative
